<b>Remote Sensing of Impervious Surfaces: An Overview</b> .....	xv
<i>Qihao Weng</i>	

## Part I Digital Remote Sensing Methods

<b>1. Estimating and Mapping Impervious Surface Area by Multiple Regression Analysis of Landsat Imagery</b> .....	3
<i>Marvin E. Bauer, Brian C. Loffelholz, and Bruce Wilson</i>	
<b>2. Subpixel Imperviousness Estimation with IKONOS Image: An Artificial Neural Network Approach</b> .....	21
<i>Rama Prasada Mohapatra and Changshan Wu</i>	
<b>3. Mapping Impervious Surfaces Using Classification and Regression Tree Algorithm</b> .....	39
<i>George Xian</i>	
<b>4. Mapping Urban Impervious Surfaces from Medium and High Spatial Resolution Multispectral Imagery</b> .....	59
<i>Dengsheng Lu and Qihao Weng</i>	

## Part II Technological Advances in Impervious Surface Mapping

<b>5. The SPLIT and MASC Models for Extraction of Impervious Surface Areas from Multiple Remote Sensing Data</b> .....	77
<i>Yeqiao Wang, Yuyu Zhou, and Xinsheng Zhang</i>	

6. **Extracting Impervious Surface from Hyperspectral Imagery with Linear Spectral Mixture Analysis** ..... 93  
*Qihao Weng, Xuefei Hu, and Dengsheng Lu*
7. **Separating Types of Impervious Land Cover Using Fractals** ..... 119  
*Lindi J. Quackenbush*
8. **Fusion of Radar and Optical Data for Identification of Human Settlements** ..... 143  
*Paolo Gamba and Fabio Dell'Acqua*

### **Part III Transport-Related Impervious Surfaces**

9. **Transportation Infrastructure Extraction Using Hyperspectral Remote Sensing**..... 163  
*Ramanathan Sugumaran, James Gerjevic, and Matthew Voss*
10. **Road Extraction from SAR Imagery** ..... 179  
*Uwe Stilla, Stefan Hinz, Karin Hedman, and Birgit Wessel*
11. **Road Networks Derived from High Spatial Resolution Satellite Remote Sensing Data** ..... 215  
*Renaud Péteri and Thierry Ranchin*
12. **Spectral Characteristics of Asphalt Road Surfaces**..... 237  
*Martin Herold*

### **Part IV Roof-Related Impervious Surfaces**

13. **Urban 3D Building Model from LiDAR Data and Digital Aerial Images** ..... 251  
*Guoqing Zhou*
14. **Building Extraction from Aerial Imagery**..... 269  
*Armin Gruen*
15. **SAR Images of Built-Up Areas: Models and Data Interpretation**..... 297  
*Giorgio Franceschetti, Antonio Iodice, and Daniele Riccio*
16. **Roof Mapping Using Fused Multiresolution Optical Satellite Images** ..... 331  
*Yun Zhang and Travis Maxell*

## Part V Impervious Surface Data Applications

<b>17. Impervious Surface Area and its Effect on Water Abundance and Water Quality</b> .....	353
<i>Toby N. Carlson</i>	
<b>18. Impervious Surface Area Dynamics and Storm Runoff Response</b> .....	369
<i>Assefa M. Melesse and Xixi Wang</i>	
<b>19. Growth of Impervious Surface Coverage and Aquatic Fauna</b> .....	387
<i>Robert R. Gillies</i>	
<b>20. Using Remotely Sensed Impervious Surface Data to Estimate Population</b> .....	409
<i>Bingqing Liang, Qihao Weng, and Dengsheng Lu</i>	
<b>Authors</b> .....	431
<b>Index</b> .....	441
